PureSpa™ by INTEX®

Fiber-Tech™ Technology provides the ultimate comfort and support.

HARD WATER TREATMENT SYSTEM

Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system.

The system generates an electromagnetic field that agitates calcium and other minerals in the water, causing them to create suspended crystals.

The suspended crystals of hard water elements are retained in the filter cartridge, leaving soft water in the spa.

Hard water buildup limits water flow and reduces the life of your spa.

JET & BUBBLE DELUXE

PURE PERFORMANCE

The PureSpa™ Jet & Bubble Deluxe combines the pleasures of a high-performance jet massager and a bubble massage spa in one luxurious setting. High-performance engineering and Hydro Aeration Technology™ make the PureSpa™ Jet & Bubble Deluxe the gold standard in luxury spas.

Available in
4 and 6 person sizes

IMPROVED WATER CIRCULATION

Hydro Aeration Technology™ enhances filtration efficiency. Fine particles clump together and settle to the bottom of the spa during the aeration process, making it easier to remove and filter particles through the filtration system.

INCREASED NEGATIVE IONS AT WATER SURFACE

The aeration process increases negative ion concentration by infusing spa water with air.

ENHANCED POWERFUL AND SOOTHING BUBBLE JETS

By mixing air with water, the total volume of bubbles is increased to give you a more vigorous and soothing massage.
